NGUYEN THUY XUAN TRANG

FRESHER PROCESS QUALITY ASSURANCE

0964 051 634 nt.xuantrang09@gmail.com Binh Thanh - Ho Chi Minh City

SUMMARY

With 6 years of professional experience, combining 4 years in store management and 2 years as a B2B SaaS Consultant for the B2B SaaS product, focusing in POS solutions for the Beauty & Healthcare industry, I have gained experience in user experience, software processes, and quality-related activities. Coming from an Consultant background, I have strong attention to detail, problem-solving and teamwork skills. I am looking for an opportunity in Process Quality Assurance to apply my experience and grow in a professional environment where I can develop my product thinking, end-user mindset and quality awareness to create new value for both users and the business.

EDUCATION

Van Lang University *2015 - 2019*

Major: Hospitality Management

Graduated

WORK EXPERIENCE

MYSPA JOINT STOCK COMPANY *05/2024 - 04/2026*

Consultant Executive & Support

- **Product Demo & Consulting**: Conducted product demonstrations, analyzed client requirements, and recommended tailored software solutions.
- **Testing:** Collaborated with Product team to test software features. Verified that the system works correctly based on client requests.
- **Defect Reporting:** Identified, classified, and reported UI/Logic bugs to the Product team to improve user experience.
- **Process Control:** Controlled the software flow during the On-boarding process. Supported final inspection before delivering the product to clients.
- **Reporting:** Managed clients data, analyzed daily process status and created regular reports.
- **Collaborated** with Clients, Developers, Support team to review solutions and promote working and solve problems smoothly.
- **Client Management:** Managed and developed enterprise accounts, ensured revenue targets were met in line with assigned KPIs (80 - 90%).

Result:

- Continuously achieved Monthly/Quarterly Best Seller due to deep knowledge of system features, minimizing customer complaints about software bugs.
- Maintained a stable customer conversion rate of 70% - 80%.
- Increased new customer acquisition from partners and existing clients.

RIO STORE - MOM & KID STORE *02/2020 - 03/2024*

Store Manager

- **Managed and coordinated** store operations to ensure adherence to operational procedures and quality standards.
- **Monitored inventory and daily reports** with high attention to detail, ensuring 100% data accuracy and minimizing operational risks.
- **Analyzed market trends and customer needs** to propose effective business solutions and optimize product consulting plans.
- **Collaborated on marketing and communication activities** to enhance brand awareness and process efficiency.

Result:

- Boosted revenue by 15-20% through operational optimization and improved customer service.
- Significantly reduced errors and risks by streamlining daily workflows.

PROJECTS

Prepaid Card Feature Development - PROJECT OLIVE *25/03/2026 - 28/04/2026*

Role: Requirements Analysis & Quality Assurance Support

- Gathered and analyzed client requirements for tiered prepaid card discount configurations.

• Reviewed business rules, user permissions, and feature specifications to ensure completeness and compliance with client requirements.
• Collaborated with Product team and Support team during feature validation and testing.
• Verified implementation of key constraints, including promotion stacking prevention, card modification restrictions and payment method controls.
• Supported UAT by preparing test scenarios, tracking client issues and collaborated fixes before release/acceptance.
Result: Delivered the feature on schedule and achieved 100% client approval rate after feature delivery.

Digital Treatment Sheet Development - FUTURE BIOMED CLINIC *11/03/2026 - 25/04/2026*

Role: Requirements Analysis & Quality Assurance Support

• Gathered and analyzed client requirements, reviewed Digital Treatment Form structures based on business specifications.
• Tested data accuracy and synchronization between Customer, Schedule and Order modules.
• Verified digital signature rules, ensuring a case could only close after approvals from both Doctors and Nurses
• Verified user permissions, business rules, and cross-department process alignment to ensure compliance with operational requirements.
• Conducted feature validation, issue tracking, and quality reviews throughout the implementation process.
• Supported final quality inspection, coordinated with Product team for issue resolution and retesting activities.
Result: Delivered the feature on schedule and achieved 100% client approval rate after feature delivery.
